

MMT NAMES NEW GENERAL MANAGER TO GLEBAR

Charlotte, NC, USA – March 7, 2022 - Medical Manufacturing Technologies (MMT), a global provider of medical device manufacturing solutions, today announced Andreas (Andy) Stobbe as General Manager of Glebar, its centerless, micro-grinding, and Electro Chemical Grinding (ECG) & cutoff technologies division.

As General Manager, Stobbe is responsible for the day-to-day operations of the Company's manufacturing facilities in Ramsey and Pennsauken, NJ. In this role, he will streamline operational procedures to ensure increased production and continuity in service to enhance division efficiency.

Throughout his 20-year career, Stobbe has held several executive leadership positions. He successfully implemented effective growth and development strategies through improved process planning and quality assurance programs that improved product-to-market delivery. These strategies achieved increased production and high growth objectives.

"We are confident that Andy's operational expertise will drive improvements and continuity that support Glebar and its position as a global leader of ECG and Micro Centerless Grinding technologies," said Rick Stetler, Chief Operating Officer of MMT. "His presence and commitment to excellence will continue to differentiate Glebar in the marketplace."

MMT's equipment portfolio currently includes [electrochemical](#) and [micro centerless grinding](#) applications, [micro coil winders](#), [catheter laminators/reflow](#), [mandrel pullers](#), [liner stretchers](#), [catheter tipping](#), [cutting](#), [drilling](#), and [punching](#) technologies.

Glebar is a global leader and innovator in the micro centerless grinding and ECG and cutoff industry. Glebar's versatile suite of [precision grinding machines](#) and [automated turnkey grinding systems](#) can process a multitude of [materials for end-use applications](#).
